TO PACIFY THE PEOPLE

Belgian Legislators Vote For Universal Suffrage.

THE RIOTING STILL CONTINUES.

Number of Strikers Killed and Others Troops Being Called Out for Fear of

BRUSSELS, April 19.—The chamber of representatives reassembled after the preparation of the reports on the revision of the constitution, and by a vote of 119 against 112, with 14 abstentions from voting, universal suffragist, with a provision for plural voting by the classes owning property, according to the amount and situation of the property. Cheers within the chamber were followed by prodiguous acclamations from the enormous crowd that awaited the result of the voting outside the chamber. The greatest enthusiasm was displayed everywhere, and the people joined in a jubilee in honor of great triumph which they

had achieved. It is expected that the decision in favor of universal suffrage will have an allaying effect upon the popular excitement and agitation, which had been rapidly assuming the dimensions of a general insurrection. The dread of a terrible uprising of the people, similar to that of the French revolution in its resistless rage against privilege and power, had the effect of bringing the chamber of representatives around to the popular There is no doubt in many minds that had the chamber not acted promptly there would have been a revo-

lution in Brussels. The most serious disturbance was among the candlemakers at Bourgenhout, near Antwerp. Those who remained at work were attacked by the strikers and the troops were called upon to protect the workers and restore order. The strikers continued their attacks as though no 'troops were present. On a full run, with leveled bayonets, the soldiers charged upon the rioters and drove them away. Four of the strikers were killed and 15 others received more or less serious bayonet thrusts. It is certain that some of the wounded will die. In Antwerp the outlook was more threatening, despite the fact that extraordinary military pre-cautions have been taken to preserve the peace. Among the more prominent of the agitators in Antwerp are a number

anarchists. Of these two, Fabry and

Welters, were placed under arrest. While troops are being called in readiness for disturbances that are threatened in all parts of the kingdom, it is feared that the worst may come from other parts of the continent. There is a tendency for an epidemic of socialistic outbreaks, but all the powers realize the danger of the Belgium situation. The French government has instructed the governments of the northern industrial towns to expel any foreigners who may be organizing to assist in the revolution in Belgium. The Belgium socialists at Roubaix have resolved to disregard these measures and have met and proposed a resolution declaring their readiness to subscribe and otherwise assist their brethren in Belgium. A large proportion of the miners at Roubaix, Armentieres, Pas-De-Calais and other districts adjoining the Belgian frontier. are naturalized Belgians, and the French socialists are making efforts to induce them to strike in order to assist the agitation in Belgium by stopping the sup-

plies of Belgian customers. The Arbitration Conference.

PARIS. April 19.—At the sitting of the Bering sea court of arbitration, Mr. C. Coudert of counsel for the United States, continued his speech in support of the American contention. He recapitulated the arguments ad vanced last week, and then proceeded to show that the jurisdiction of the United State had always been based upon prop erty interest, now sovereign dominion over the sea. Mr. Coudert quoted from diplomatic correspondence, and from the opinions of English jurists regarding the nkase issued by Russia in 1821. America and Great Britain had jointly protested against this ukase, but Great Brit ain had withdrawn her protest because

of the Monroe doctrine.

An Alliance Probable

CINCINNATI, April 19. - The Ohio Southern is now being extended to Lima, At this point a junction will be made with the Lake Erie and Western, and it is thought by many that since Calvin S. Brice is one of the monopolists in the Lake Erie and Western family, an alliance of that road with the Ohio Southern is one of the objects simed at.

NEW LAWS IN OHIO.

An Important Street Railway Measure Passed and a Bit of Other Legislation. COLUMBUS, O., April 19.-As was anticipated, the house committee on corporations reported back the Strehli street railroad bill. It was promptly passed by the house. Mr. Tischbein procured the adoption of an amendment reading thus: "Provided, however, there shall not be any change made in Wounded by the Soldiers—Extra the percentage on gross earnings and Troops Being Called Out for Fear of car license fees that may be required to be paid on such street railway route or routes or any portion of the same, or any extension of such route or routes." The amendment is inserted at the end of line fifteen of the bill, at the end of the present section 2502 and immediately preceding the new matter added to the

section by the Strehli bill. The vote on the bill was 66 to 9. In the senate Senators Carpenter, Hildebrand, Boxwell, Eli and Boezel were appointed as members of the conference committee on the general appropriation bill. Senators Abbott. Iden and Forbes, and Representatives Griffin, Brittain and McClure are members of the conference committee on the Abbott bill, providing for the vestibuling of electric and motor street railway cars during the months of November, December, January, February and March.

Bills were passed as follows: House bill, by Mr. Davis, reorganizing the municipal governments of Akron and Youngstown; senate bill, by Mr. Parker, imposing upon deputy sheriffs and constables the duty of enforcing the game laws; house bill, by Mr. Bruck, providing that joint stock companies may at the time of incorporation issue preferred stock and provide for the payment of dividends, etc., the owners of the preferred stock in preference to other stockholders; house bill, by Mr. Reiter, making the weight of a bushel of popcorn,

in the ear, 42 pounds. The Strock bill, prohibiting the publication of indecent advertisements, was reconsidered and referred to a standing

committee. The house committee on prisons reported back the Reeve bill to abolish capital punishment without recommendation. Van Loon and Jones, the present occupants of the penitentiary annex are not likely to escape hanging by legislation. The Nichols station bill comes up as a special order in the house Wednesday morning. A poll of the house members shows 55 for it, 20 noncommittal and about 25 against it, unless amended. The indications are that

COLLEGE STUDENTS AS GUIDES.

Exhibitors Will Not Be Allowed Free Passes-Two Hundred Drinking Fountains Put In-The Washington Building to Be Dedicated Friday.

CHICAGO, April 19. - Four Zulus started to "do" the Midway Plaisance and got into trouble. The men at work on the Irish village have a grudge against the colored population since one of them was stabbed by a colored boy. Some of these Irishmen have just come from Ireland and some are from the County Waterford settlement and one of them was from Tipperary, where they learn to throw stones with sufficient precision to knock a policeman out at 50 yards. This gentleman picked up a piece of staff from the castle of Killarney and hit a Zulu in the jaw with it. The Zulus have practiced throwing assegais and things and are not unhandy with a brick. One of them deftly delivered an inshoot on the Irishman's waistcoat and bowled the Tipperary man over like a tenpin. A roar of: Will some mon hould me coat?" arose from the sweet castle of Killarney. The Zulus began to utter war cries and lay in an ammunition of clubs and rocks. Just then Captain Horace Elliott charged down with some secret service men and

Washington's state building will be dedicated Friday or Saturday of next week. Governor J. H. McGraw and staff are coming, also Senators Watson C. Squire and John B. Allen and Congressmen Wilson and Doolittle, Aside from them 15.000 patriotic Washingtonians will be on hand to hurrah for the

raising of the flag. Freshmen and sophomores attending Chicago university, to the number of nearly 60, have been accepted as Columbian guides and as such donned the uniforms of the guards, now so well known to visitors of the fair. Several hundred applications are now on file from young men of this class. Among the institu-tions reported are Yale, Harvard, Princeton, Oberlin. John Hopkins, and all the

leading state universities in the country. Two hundred drinking fountains, each supplied with a filter, are now being put in position in the various buildings and throughout the grounds of the "White

City."

A CHANCE FOR EVERYONE.

MR. M'CLYMONDS ON STREET RAIL-WAY MATTERS-

Anybody Who Wants to Invest in the Navarre Line Mow Has a Chance to Do So-He is Ready to Help Bulld Another Branch to Canal Fulton.

After the conclusion of the council meeting this morning a reporter met Mr. McClymonds and made inquiry as to the intentions of his company on the matter of building to Navarre.

"Why," said he, in reply, "we will promptly accept the ordinance and file the bond. We will then proceed in a extreme propriety, until one day when regular business like manner to build the road We will first baild to the asylum and get that part of the line in operation. We will confer with the county commissioners and the proper ty owners along the line as to the best place to put the road, as to the center or to one side, and will locate it where the public and private interests along the line require. There won't be any force work about it; we will try to harmonize all interests."

"What about a line in Navarre?" was asked.

"We expect to see the council and leading citizens of Navarre, and have no doubt we can come to terms on a reasonable franchise. I understand the only serious point in dispute is the sort. power house question. Now as we have a power house right at this end of the line, another one at Navarre would be no more good than the fifth wheel to a coach, and certainly would not help the town of Navarre in any way. As business men, they will soon see the matter in that light and all differences will readily be arranged. It may take a little time but we will push proper basis can be agreed upon-the ordinance gives until October to build to the asylum and gives one year to build to Navarre. We suggested that period so as to give plenty of time to arrange all details, and I will be much surprised if we do not get everything settled along the whole line and the work started in the near future."

The reporter asked whether anything would be done in the way of other extensions.

Mr. McClymonds said: "Our company has decided to take action in the immediate future looking to a line to The "shelis" are the hulls of Eng- Brookfield. WHAT MR. LYNCH SAID.

reporter also met President Lynch of the old company, and in-quired whether he had anything to say bout Judge Young's points against the ordinance from a legal point of view. Mr. Lynch said: "In my opin-ion there is absolutely nothing in them. The statute requires the consent of property holders. The asylum trustees are the holders of that property, made so by law.

"That point was carefully considered in advance," said he, "and they gave us a right to run along the highway. the ordinance."
"Will the road go ahead?"

"Oertainly; we will carry out our original plans to the letter.

"Suppose the Navarre council awards its franchise on the 20th itst.?" "Sufficient unto the day is the evil thereof," said Mr. Lynch. "We expect to see the people down there soon, and I think we will get everything straight-ened out to their satisfaction."

A THRILLING TALE FROM THE REGION OFIMILLPORT. Unimpeachable Testimony to the Mid-

usually quiet village of Millport is public fancy. very brief space of time by Mr. Adolph Koontz is haunted. This house, unlike some of those ancient low roofed, vine covered cots, which lay claim to nightly visitations of uncanny beings to do away with all ornament and all from a spirit world, is a plain frame brightness of color. structure, built after the most modern form of architecture, and there is nothing about the building that would suggest even to the most superstitious, the presence of any of those spirits of modest and unobtrusive colorings: but departed ones whose wanderings now they are to have speckled vests and should be confined to exploring the loose and bright hued neckties, and realms of a better world, instead of returning to this vale of tears to reawaken unpleasant memories of forgotten past, and to frighten timid persons into convulsions. The report coming as it does from a gentleman whose honor and integrity is unim-peachable, and corroborated by persons whose veracity is beyond question,

cannot be doubted Your correspondent interviewed Mr. Koontz this morning and in response to inquiries he said that during his first night in the house the handle of a cistern pump kept continously going up and down as though some one were operating it, although no living person was in sight. The doors refused to open or shut, the dishes in the cupboard rattled continously and foot steps could be distinctly heard in different parts of the house.

THE PLOT THICKENS.

The second night of his stay, having occasion to go down stairs after having retired, he thought be heard footsteps on the front porch, and upon glancing toward the front door he was startled and terrified as he beheld an apparently headless woman enter the door, although he positively declares the door neither opened hor shut. The apparition then prodeeded to follow him wherever he went, until he entered a lighted room, when it suddenly disappeared. He said when he tried to touch the being that his hand seemingly passed through her body and out the other side, but came in contact with no substance, and when he spoke to her she answered him not.

MR. KOONTZ CONCLUDES TO MOVE. Mr. Koontz is a man of undaunted courage, but the scenes through which he had passed the two preceding nights were very trying to his nerves, so the next day he moved out, and will now build a house for himself. The house was formerly occupied by H. M. Platt, an engineer in the employ of the Mil-port Coal Company, and when asked for his opinion regarding the affair, was very reticent, and refused to say much, but as Mrs. Platt stayed alone at night every alternate week, while her husband was at work, without ever having seen anything unnatural about the place, it is evident that her ghostship confines her pranks entirely to the annoyance of persons of the masculine

▲ Dress of the Queen of Greece—Men Have Too Somber Clothes Anyhow, Says Olive Harper-Scandalous Handkerchiefs and Horrid Cravats-Two Charming Gowns.

[Special Correspondence.] New York, April 13.—Some of our brightest fashion writers have asserted recently that some of the dresses are made yards around. I had my doubts about 10 that and went to work with a tapeline, and after 10 days in every first class house in this city I declare that the wid-

The majority of the dresses that are stiffened out are from 81 to 4 yards around. They look much wider than they really are because of the stiffening which makes them fall in stiff waves rather than close, flat folds, as they did before; but it is safe to say that no one but the skirt dancers wear such exaggerated widths, and they have the thinnest of textures.

A photograph that has been taken of the queen of Greece within a month and she is noted for her exquisite taste in dress, and she has all her gowns from Paris-shows a skirt close around the hips and mildly wide around the bottom. The dress is of soft gray wool, with two bias bands around the bottom of gray silk with magenta raised dots all over it. The sleeves are leg o' mutton, not very large and rather drooping.

I have noticed a great many pieces of woolen goods with raised dots in contrasting colors as well as darker shades of the same color. The dots are small and regularly placed. I think one, where the ground was a lovely shade of tan and the little tufts were of green silk, was as pretty a piece of goods as has come under my vision in many a day. The dots were so small and so close that at first glance from one position it looked all green, and then another view showed the underlying color. There is something delightful always in the unexpected, and that, I think, is why the changeable effects have taken such a strong hold on

Up to now-that is, for many generations-their brilliancy has been mainly derived from neckties, and even there they were greatly restricted to the most handkerchiefs with bright red polka dots and checker boards, and in fact unlimited fancies in colored borders. But I advise the gentlemen to make their own purchases, for tasteful as women are in their own gowns and gear, just so ignorant they appear regarding the proper color or form of the things their dear little souls delight in purchasing for their "hubbies." A little secret I must confess in this regard, and that is that those

To Move Kentucky's Capital.

LOUISVILLE, April 17.—It begins to look as if the light for removing the state capital from Frankfort is in earnest this time, though such efforts have been constant and unsuccessful for the past 20 years. The Louisville council has ordered an election on April 27, on a proposition to issue \$1,000,000 of bonds which wil be given the state together with a suitable building site if the capital is removed to Louisville. Lexington has offered \$250,000 and a building site.

California will doubtless supply the most beautiful and interesting exhibit of any state at the World's fair. I shall not go to the exposition, for I cannot bear the humiliation of seeing North Carolina's meager showing compared with the enterprise and wonderful beauty of this state's exhibit.

An entire orchard of oranges in bearing has been taken up bodily, and with the trees carefully boxed and the roots and soil complete will be reproduced at Chicago. That is only a little pointer on the style of enterprise that will crop out wherever California's name appears.

I compare this with North Carolina because one of the fair officials from North Carolina has spoken to me several times about her utter negligence in regard to the matter and the sorrowful display as it will appear when compared with other states. Should this reminder be the means of arousing a sickly ambition 1 am content.

North Carolina beats the world on apples, and the pokeberry ink grown there is redder than any I have ever before encountered. As the poet so truly and so graphically goes on to state:

At Riverside I met my old friend W. J. McIntyre. Years ago he was the agent of the government at the seal islands. He staid there with his family for years among the Aleut Indians and studied the whole seal industry. He made a long and careful report, showing how the government might with a thorough, careful supervision kill 100,000 seals per year and not damage the plant. This report took all his spare time while there. He returned in tur garments, he and his wife and little girl, and with a head of whiskers that people came hundred of miles

The New York press was eager to get some of the matter contained in his report, but he said, "No, at belongs to the government." So, although he was not rich, he was loyal. He took the report to his chief and offered it to him.

He was leaning against the corner of a building on Main street and discussing the hardships incident to the life of a laboring man. "I don't care what they say," he announced, "I believe it's the duty of every man to provide liberally for his family. Of course I don't say that the wife shouldn't help, if she can, but I mean that a man who is married and has children should be liberal and not go teen of the eighteen players who took part around blowing in his stuff at bars for in that contest are alive. The ready acceptance by lawyers of fees and "retainers" from bad men, and especially from those whom the public feel to be working against their interests, is often the occasion of sarcastic

A HISTORICAL BATTLE ROYAL

Stocking Game Recalled.

Can the Veterans of 1870 Be Again Brought Together?-All but Two Yet Alive and Well-The Defeat After Slaty-nine

history of the national sport. No other contest on the diamond before or since that day claimed such widespread attentention nor had attached to it such bitterness of defeat on the one side or so much glory in victory on the other. The game was played on the Capitoline

ground in Brooklyn in the presence of over 10,000 people. The victors were the At in all, and am PERFECTLY WELL in every way, lantics of that city. The vanquished were the until then unconquered Red Stockings of Cincinnati. I have recalled this notable game for the purpose of putting on record a suggestion

broached to me that an effort should be made this centennial year to get the mem bers of those two famous nines together so far as it is possible and have them meet in another contest at Chicago on the 14th of June of this year, just 23 years from the date of the famous game. The scheme is not impracticable. Six-

pitcher of the Red Stockings, and Right Fielder McDonald of the Atlantics. The other 16 participants in the great game I have succeeded in locating as follows:

Douglas Allison, catcher of the Red Stockings, is a clerk in a government department at Washington. Charley Gould, the first baseman, is a policeman in Cincinnati Charley Swease, the second baseman, is living at Haitford. George Wright, the shortstop, is in the sporting goods business on Washington street, Boston Fred Watterman, the third baseman, is in Cincinnati, but what business he follows I do not know. Andy Leonard, the left fielder is living somewhere in Ohio Harry Wright, captain and center fielder, is manager of the Philadelphia National League club Cal McVey, the right fielder, s a contractor, living near San Francisco, Brainerd is dead, but the substitute pitcher, Atwater, is alive and could be used to fill out the nine.

Of the Atlantic nine only McDonald, the right fielder, is dead. Robert Ferguson, the catcher and captain, is living in Brooklyn with plenty of money saved from his pro-fession to maintain him without hard work. George Zetlein, the pitcher, is in business in Brooklyn, as is also George Hall, the left fielder. Joseph Start, the first baseman lives in Providence Lipman Pike, the second baseman, is in the gentlemen's furnishing goods business in Brooklyn. C J. Smith, the third baseman, is a farmer on Long Island R J. Pearce, shortstop, 18 a watchman in a sugar refinery in Brooklyn J. C. Chapman, left fielder, is manager for the Buffalo Baseball club of the Eastern league. The substitute player of this tearn is also living and could take McDonald

If these veterans of 1870 could be brought together at Chicago on the 14th of next June, they would be givened by a croy d of spectators surely not smaller than that which sew them play the great game on the Capitoline grounds in 1570. Of course their skill with but and ball has very great ly deteriorated in the fraction less than . quarter of a century which has passed since they met in Brooklyn, but the people wie would go to see them play now would no expect to see them repeat the display of agility and professional qualities which distinguished their work then.

The Red Stockings played 69 games in 1869, winning 68 and tieing one with the Haymakers of Troy, who objected to a de cision of the umpire and left the field They started out in 1870 fully aware that money was being freely spent in a number of cities in an effort to get up a team which could and would reap the glory of givinthem their first defeat. For such a purpose only were the Chicago White Stockings go together. And though this team did subsequently defeat the Cincinnati visitors twice, thus virtually giving the great and famous club its deathblow, the Atlanticgot the credit of checking their victorious march through the land

If Harry Wright's advice had been taker at the time, the day of humiliation would have been postponed. At the end of the much unning the score was a tie-5 to 5 Both captains were willing to call it a draw. but President Champion of the Cincinnatis. who was present, called up Captain Wright and instructed him to play it out

So the Red Stockings went to work again and by good batting, aided somewhat by a collision between Hall and McDonald, scored two runs, giving them the advantage

When the Atlantics went to bat for their half of the inning, Captain Wright became aware that Brainerd was weakening Smith led off with a safe grounder past third and immediately went to third on a wild pitch. The crowd was now a great mob of cheering enthusiasts, and the scene aided materially in unnerving Brainerd Joe Start followed Smith and sent the ball into the crowd at right field McVey pushed his way through the crowd, and us he reached for the ball on the bank a rough assaulted him. The crowd, however, was there to see fair play, and the man who interfered with the play was roughly han dled. Before McVey had fielded the ball home Smith scored, and Start was on third

When Captain Ferguson came to bat, he faced Bramerd left handed. His evident object was to evade George Wright's field and pull the ball toward a weaker spot in man I've been looking for. I'm in search the infield, and as he batted equally well right or left handed this act was recognized as one of good policy The result proved it to be so. He sent the ball between second and first driving home the treing run again to the music of 10,000 throats. Zetleinsent Gould a hot liner which the

latter stopped, but could not field in time He then tried to catch Ferguson at second base, but threw low. Sweasy made a bad muff, and letting the ball get away from him Ferguson scored the winning run. A double play immediately afterward ended the game, and the telegraph was soon flashing the news to every part of the United States that the Cincinnati Red Stockings after 15 months of uninterrupted victory had met their Waterloo.

Mr. Davenport never thought it worth while to take out a patent on this excasting of lots, and such action was tremely useful invention until it was in East Greenville appraised at \$300.

The first railroad charter in this country was for the Boston & Lowell, but the Boston & Worscester was the first line in operation. Mr. Davenport says that the trains ran upon strips of wood called "snake rails," from the fact that they would often curl up, and punch were covered with iron straps and were noon, to the effect that on the 30th day clamped to the ties. Enormous Wealth In Storage Vaults-Hun-Bonds Deposited.

[Special Correspondence.] New York, April 13 .- From \$500,000,-**000** to \$600,000,000 worth of private property is constantly housed in a few great storage warehouses in New York. This property includes every conceivable article of a movable nature, from house furniture to diamonds. The earlier storage warehouses were places in which persons temporarily vacating their homes might store furniture that they did not all appearances, be equal to the greatest and punishment for the offender. A | evening a couple of months ago I stood great trunk in the basement of one such warehouse bears upon its face the magic initials, "C. V." Its list of depositors would sound like the roll of Ward McAllister's Four Hundred. One house alone is believed to contain upward of \$200,- | terest, not unmixed with anxiety, the 000,000 worth of property. Household frantic efforts of men and women and furniture and paintings and the like make up a small percentage of this sum. Down in the lowest basement are the silver vaults, the trunk rooms and rows upon rows of little safe deposit boxes. A box 5 inches square and 18 inches long may contain a fortune.

One man whose wealth is estimated at \$50,000,000 rented such a box for his wife and placed in it £100,000 in Bank times, when the street car lines of the of England notes, saying that whatever happened to him or the United States she was sure of a fortune. One of the most curious developments of the storage business is the use of these houses by wealthy women as jewel caskets. s likely to be kept reasonably busy.

One of the most accomplished pickpock ets the Chicago police expect to be called upon to cope with is one Mollie Matches, with aliases too numerous to mention. Like the "man of many faces" sometimes seen at vaudeville entertainments, Matches is a man of great adaptability, and you can never guess what disguise he may next assume. Matches is said to be worth over \$100,000 and boasts that he can steal anything a man has without his knowing it One of his slickest jobs is thus described by the writer above referred to:

"Matches was traveling from Cleveland to New York. News had been received that man with \$40,000 was on the train, and Mollie and three 'pals' started after him determined to get the money at any ri-k. From a description they had they recognized him as one of the few passengers in the smoking car. Two of the men took a seat in front, while Mollie and the other crook sat directly behind him to await developments. They were all well dressed and looked like country merchants. Finally the man arose and stepped into the aisle. It was certainly a strange coincidence but nothing very remarkable that the four crooks should step into the passage at almost the same moment. Of course the five mon collided, and there were profuse apologies and long explanations before the part-

ing.
"Five minutes later the \$40,000 man discovered he had been robbed, and the most remarkable part of it was the empty wallet still remained in his pocket. He complained to the conductor, and telegrams were sent to the New York police to have detectives at the station when the train arrived. Mollie had the money, that was certain, but he was also reasonably certain that he would be caught when he attempted to leave the train with it, for there is no more generally known criminal extant than Matches. He walked through the coaches, hoping that something might turn up by which he could save himself and the \$40,000. "In the last car he found a clerical look-

ing man with a little girl on his lap, and Matches, who with his long beard looked anything but a crook, sat down in the sect and began tanking. The stranger did not belie his looks. He was a minister and was for audience are denied. Mrs. Cleveland going to New York to solicit funds for rightly assumes that she is not required erecting a church. This particular budge of mourning she wears for several days and sometimes weeks after the funeral, and then again she is very apt to marry some other fellow within a week or a month of the death of her first lord and master. MRS. CLEVELAND'S NICE RECEPTIONS IN THE BLUE ROOM.

Noted Fathers.

[Special Correspondence.] WASHINGTON, April 13.-Mrs. Cleveland gives two receptions each week in the blue room of the executive mansion, and very popular receptions they are. They are not public levees, and in order to be admitted one must have an invitation. One of the peculiarities of Washington social life is that here people openly ask for cards of invitation, and four-

Every week hundreds and thousands of applications by her position to submit to the inspectainingly, and Mollie quite won him over tion of mere curiosity seekers. At least she is not required to do so at this time.

Naturally there are people who do not approve Mrs. Cleveland's present policy. They say she is the wife of the president, and it is as much her duty to see all callers as it is her husband's. These ! are the same sort of people who go to the White House with a certain sense of proprietorship. Because it is public property they cannot see why every room in the house is not thrown open private apartments, to go into the kitchen, the linen press and to be permitted

Though Mrs. Cleveland receives her guests at midday, she has all the windows of the blue room darkened, and the only illumination in the apartment is that made by a small cluster of incandescent lamps away up near the ceiling. It is not very much of a light, but what there is falls softly and prettily from its elevated position. The effect, though novel, is really very charming. Mrs. Cleveland is usually gowned in something loose and flowing, and much comment is heard on her matronly appearance compared with her girlishness during her former residence here. She has a fascinating way of looking her callers straight in the eye, of maintaining a lingering clasp of their hands and of say ing sensible things in a sensible way. As I stood watching her for a few moments the other day I perceived that she started and gave directions to four out of five of the little conversations between her and her guests. There was I nothing stereotyped or stilted about the talk either. This is true grace. What is tact in a man is grace in a woman. The need of a new White House, which

I have often argued, was shown on Easter Monday. The mansion was througed with women and children. Inasmuch as the White House has but one door, ladies who waited to see Mrs. Cleveland could not get in, and those who were in could ALFRED DAY. - not get out. Among the latter was Mrs. Bissell, wife of the postmaster general. She had made a friendly call on Mrs. Cleveland, and it took her nearly an hour to make her escape from the building. For 15 minutes she stood tightly wedged in a mass of humanity, unable to stir a step. She took it all very good naturedly, as she did some of the remarks which she was forced to overhear in the crowd. Said one woman in Mrs. Eissell's hearing:

"I don't think this administration ought to put on any airs. Why, the wife of the postmaster general used to give music lessons!"

Mrs. Bissell tells this story on herself, and she laughs at the foolish people who for their inspection. They would like pronounce her name as if it were Essparticularly to enter Mr. Cleveland's sell, which is evidence enough of the fact that the wife of the big postmaster general is a natural, unaffected woman. A Brother's Awful Deed.

Lima, O., April 17.-Several years ago the body of John Sigler was found at Osceola with throat cut and a knife clasped in his hand. Sigler had been dead six weeks when the body was found and although there were some suspicious circumstances in connection with the case, a coroner's jury, after a long and careful investigation, brought in a verdic: of suicide. A brother of Sigler's has just made a deathbed confession to the effect that the supposed suicide was a murder, and that he committed the deed himself.

Daily Gathering for the Grand Naval Review.

TWENTY-FOUR VESSELS ON HAND.

More Are on Their Way to Hampton who appeared in behalf of the bill. Roads-Crowds Flocking to Fortress Mouroe to See the Monster Ships of Different Nations.

RICHMOND, Va., April 18.-Vessels have strived at the rendezvous at Hampten Roads, for the grand naval review in New York harbor. Ships are there from Russia, France, England, Germany, Holland, Italy, Brazil, Spain, besides our own vessels. Other vessels are arriving daily. The Dutch frigate Van Speyk, the French gunboat Hussard. German cruiser Kaiserin Augusta, and Teradler are the latest arrivals. Admiral Hopki s. commanding the British squadron, visited Fortress Monroe, and his reception was one of the most interesting events since the arrival of the distinguished foreigners.

After making formal calls on the admiral and others he and all other commanding officers of the men-of-war in the port were dined on board the Dolphin by Admiral Gherardi today. There are great crowds at Old Point Comfort and other resorts in this locality. Excursion trains and steamers are being run from Richmond and other ports. The indications are that all places in this locality will be crowded before the week closes. The Westmoreland and Commonwealth clubs of this city will go down to see the fleet on Sunday on a special train. The high school girls of this city go on a special train on Friday.

The scene ashore was a brilliant one. Several boatloads of British tars, interspersed with the red coats of British marines, were granted liberty, the English commander deeming it safe to intrust his crew upon a government reservation. A number of officers, in the traditional cheek cap and Norfolk jackets, also tried their legs ashore. The arrival of Vice Admiral Hopkins,

the first flag officer to join the American fleet, has settled the question of precedence, as it has been decided to give the lend to the nation whose flag officer should be first upon the scene, and not to that whose single vessel may have arrived. It was tirst believed that Russia would be given the position of honor.

A Decision for Charles Lafferty.

PHILADELPHIA, April 18.-In the case of the Mantua and Hestonville Passenger Railway company, which has been a bone of contention between the traction company and the People's Traction company, in the supreme court, when the decision was handed down it was found the court was equally divided, three justices in favor and three opposed to affirming, hence the opinion the orphans' court stands and Charles afferty takes possession of the road. Justice Thompson was Rafferty's attorney before the orphans' court and retired from the bench during the trial of

Columbus, O., April 18.—There was a sensational meeting of the house comnittee on corporations to consider the Strehli street railroad bill. The bill is pushed by the Cincinnati Consolidated Street railroad and Governor Foraker was one of the prominent legal lights During his remarks Governor Foraker stated that he had been approached by a representative of the Martin cable line, an opposition concern, and offered a fee of \$15,000 if he would induce the Consolidated to purchase the line. He was also promised the support of a Cincin oatí paper for certain legislation desired by the Consolidated which that paper is now fighting. He denounced the editor of an evening Republican paper at Cincinnati as an infamous liar and scoundrel and made other sensa-

tional exposures. Both branches have resumed legislative work House members of the conference committee to adjust appropriation bills are Messra. Boxwell, Ely and Boesell, but the senate members have not been appointed. It will be the policy to appoint men who will come to agreements by making concessions rather than prolong the session. The usual batch of local bills were introduced and passed in the house under suspension of the rules. One bill, by Mr. Lillard (Cincinnati), caused some comment. It provides that the Cincinnati Gas company may operate or purchase any existing electric light company's plant, Two resolutions were introduced in the house. One provides for the possible purchase of the famous old engine General," "General," captured by the Andrews raiders in Georgia. Mr. McConnell (Meigs) introduced a joint resolution to submit a constitutional amendment to the people. It seeks to amend section 3, article 13. of the constitution so as to knock out the double liability of stockholders, except where wages due operatives or laborers are unpaid. It went over under the rules. Senator Parker cannot perceive the

beauties of a uniform system of calculating time throughout the state. He introduced a bill in the senate to repeal the standard time law enacted some weeks ago through the efforts of Representative Taylor (Guernsey).

An Abstract of an Address Delivered Before the Students of Agriculture, Ohlo State University, by George W. Campbell, Delaware, O., Preside t of the Ohio State Horticultural Society.

The history of the grape is almost coeval with the history of the luman race; and from the earliest times it has held the fruits given by an all-wise Creator

There are probably not 150 varieties of grapes of native origin known or described in American books or either general or local And oneregarded as useful for vineyard culture east of the Rocky mountains. It is nevertheless true that many of the neglected or practically discarded varieties are of far better flavor and higher quality than those most popular with planters. Experience has shown that it is not the grapes of finest quality which are the most successful and profitable. Hardiness, vigorous growth, with healthy foliage, ability to carry an abundant crop to maturity, good size and fine appearance, espec ially if ripening or even coloring in time for early markethowever poor may be the quality-are prized more highly than the finest grapes of less rugged constitution which require greater care and attention from their cultivators. An almost melancholy example of this statement is found in the variety called Champion, a black grape of fairly good appearance which has all the characteristics to recommend it for general use, except quality. This is so very poor, that if the choice were between the Champion and none, I should never taste a grape during my natural existence. And still I have been told rethe plantations of the Champion, than from any other variety.

In connection with the Concord, one of its seedlings which has attained a was raised many years ago by Mr. S. Worden, of Minetto, N. Y., and seems Concord, with a period of ripening a are fully as large, and its quality by some regarded better. Were it not for a skin tender and easily broken, which distinguished parent.

Soon after the appearance of the turity. Concord, in 1856, the first exhibition of hybrid grapes was made by Mr. E. S. Rogers, of Salem, Mass. They were seedlings produced from crosses of several foreign varieties upon the mammoth fox grape of Massachusetts, and compact and handsome clusters, and excited much interest among grape growers, though the claim of the originator, that his grapes were really hybrids or crosses, was questioned, and perfect blossoms. The clusters are Later experiments, however, by many others have dispelled these doubts, and than Concord, and it keeps well, both many hybrid grapes have since been produced of greater or less importance. After three years' fruiting, I regard it Several of Mr. Rogers' grapes have taken a place among standard varieties, and the Agawam, Goethe, Herbert, Lindley, Massasoit, Merrimac, Salem and Wilder are found in most of the aware, similar in growth, with healthnurserymen's catalogues, and are suc-

Empire State, I think, has not proven successful, and does not appear to have a high and honorable position among justified the recommendations which accompanied its introduction, nor the extravagant price of \$4,000 said to have been paid its originator for its ownership and control. It is a white grape of handsome appearance, and has some catalogues which have much value good points, but has not fulfilled the expectations of planters, and does not third of that number would appear to have attained popularity ex-probably cover the entire list of those cept as an amateur variety for garden cept as an amateur variety for garden planting. It was claimed by its originator to be a cross of Hartford and Clinton.

Moore's Diamond, a later introduction, raised by Jacob Moore, of Rochester, N. Y., has met with favor in some places and is a fine grape, both in appearance and quality. The vine is vigorous and foliage healthy. So far as I have tested it, want of fruitfulness has been a serious defect during the three years I have had it in bearing.

The Witt grape, originated by the late Michael Witt, of Columbus, O., is a later introduction, not extensively planted, but seems a promising and worthy variety. It is also of Concord parentage, with large berries and handsome clusters; color white or light yellowish green; flavor fine, pulp tender, with few and small seeds. Vine hardy and healthy, with rather slender growth. It is difficult to propagate, either from single eyes under glass or out-door cuttings, and this will prevent its rapid increase or sale at popular prices for large planting.

The Colerain, which appeared soon after, is of the same general character, also white or light green, was raised by peatedly, by several large growers of Mr. Wm.
